The Encelium **ZC Zone Controller Wallstation** series is a multi-zone Wallstation that offers software configurable lighting control that provides ON/OFF switching for multiple lighting zones. The ZC Series are generally located at entry points to a floor or department and are used to activate or de-activate a lighting zone.

Wireless Wallstations enable convenient control and desired lighting levels by communicating user inputs to an Encelium Wireless Manager. The ZC Series are generally located at entry points to a floor or department and are used to activate or de-activate a lighting zone.

The ZC Wired Wallstations are low-voltage and connect to the Encelium X Lighting Control System through a GreenBus™ cable with 2-pin connectors.
