

AV Integration

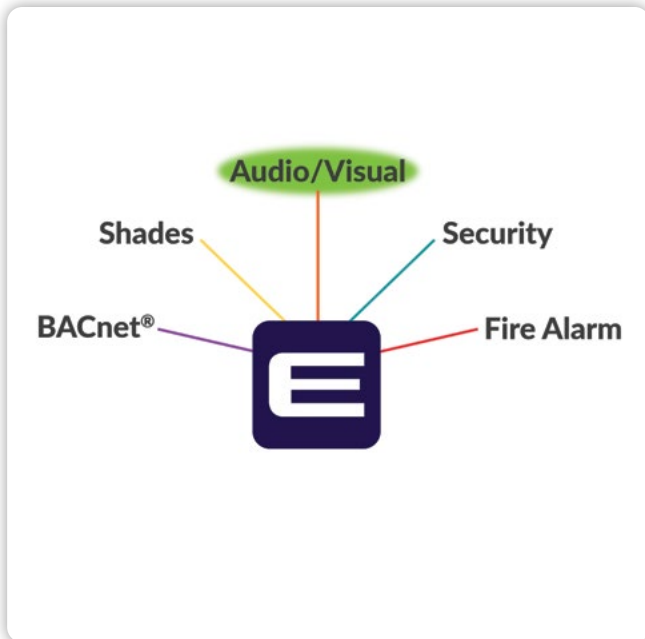

AV Interface to Audio, Visual, and Communication Systems

Date: _____

Quantity: _____

Company: _____

Project: _____

The Encelium AV Interface allows the integration of audio-visual systems to the Encelium X Light Management System. The AV Interface which resides in the Encelium SSU allows various scenarios for a given space by changing lighting, audio, visual, and communication systems to achieve the desired atmosphere. In many cases, these scenarios can be recalled through an interactive touch screen.

Common applications for the AV Interface are auditoriums, board rooms, and large classrooms.

Key Features & Benefits

- Enables preset or customized audio and video settings that can be stored, recalled, and modified as needed
- Encelium X accepts commands for the following tasks via Telnet protocol on a per-zone basis – recalling, saving and querying scenes; switching zones “ON” and “OFF”; setting brightness levels and dimming
- Works with:
 - Encelium X
 - Encelium Extend

Communication

CONNECTIONS

One of Two Connections is Required:

- A connection from the AV network to the second network card of the SSU
- OR
- A connection from the AV network to the Encelium X network switch
