

AV Integration

AV Interface to Audio, Visual, and Communication Systems

Date: _____

Quantity: _____

Company: _____

Project: _____

The Encelium **AV Interface** allows the integration of audio-visual systems to the Encelium X Lighting Control System. The AV Interface resides in the Encelium SSU and allows various scenarios for a given space by changing lighting, audio, visual, and communication systems to achieve the desired atmosphere. In many cases, these scenarios can be recalled through an interactive touch screen.

Common applications for the AV Interface are auditoriums, board rooms, and large classrooms.

Works with

- Encelium X
 - DALI Wired
 - GreenBus Wired

Key Features & Benefits

- Enables preset or customized light levels that can be stored, recalled, and modified from a Third-Party Audio/Video system
- Encelium X accepts commands for the following tasks via Telnet protocol on a per-zone basis — recalling, saving and querying scenes; switching zones “ON” and “OFF”; setting brightness levels and dimming

Communication

CONNECTIONS

One of Two Connections is Required:

- A connection from the AV network to the second network card of the SSU
OR
- A connection from the AV network to the Encelium X network switch
