Polaris

Monitor Software

Date: _____

Quantity: _____

Company: _____

Project: _____

Polaris™ Software is at the core of Encelium X — empowering facility managers and enabling the Encelium Experience.

Explicitly designed for facilities managers, our advanced Polaris Monitor software is intuitive and easy-to-use. It serves as the day-to-day window into all aspects of your Encelium X system, enabling you to monitor conditions, get insights, and make any necessary changes — quickly and easily.

Key Features & Benefits

- A single application to monitor and maintain your connected buildings

- The system interface delivers a seamless, consistent user experience from any PC or tablet

- Dashboard provides a quick overview of your space

- Navigate through your site using user-imported graphical floorplans

- Monitor and adjust lighting for a single luminaire, a zone, or an entire floor

- Adjust schedules and sensor functionality to deliver dynamic lighting

- View energy reports by strategy for the whole building or down to a specific zone

ENCELIUM

Specifications

System Requirements
- Access to the Polaris software from multiple devices (e.g., laptops, desktops, tablets) on the network requires a Windows® physical server (SSU) or virtual server
- To more quickly respond to service needs, remote access to the SSU is highly recommended

Client Browers[1]
- Google Chrome™
- Firefox®
- Safari®
- Microsoft® Edge

Device Support
- iPad® Air or iPad Mini 3+ or iPad Pro running iOS 10 or 11
- Android tablet
- Windows laptop

User Access
- Username and password required for access
- Supports multiple user accounts with configurable permission levels
- Supports up to 10 concurrent users

Footnotes:

[1] Polaris Monitor can be accessed on most devices running an HTML5 compliant browser.

Key Functionalities

Information at a Glance

The Polaris dashboard gives you a clear view of your entire building or campus.

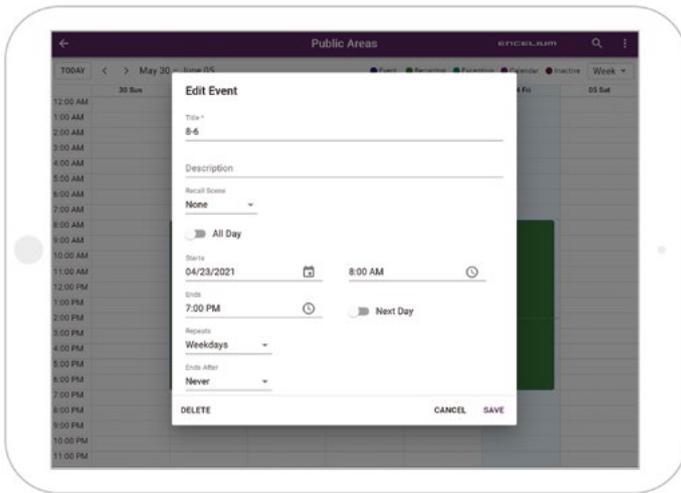

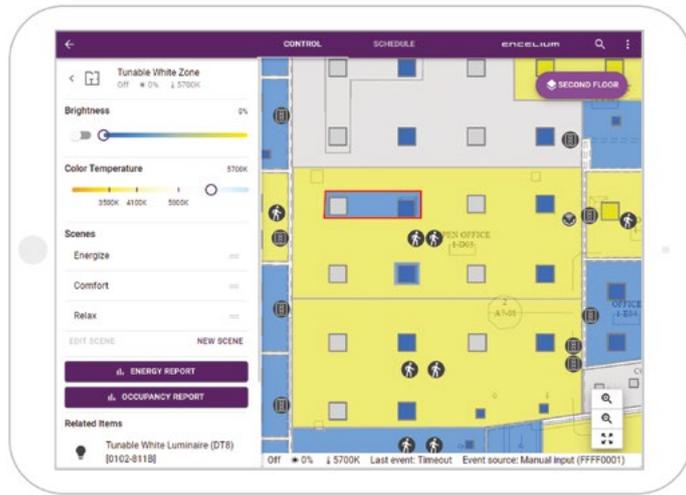

Easy-to-Navigate

With the Polaris floor plan view it's easy to navigate an entire building, so you can monitor conditions and adjust as needed.

Create Dynamic Spaces That Promote Occupant Comfort

Adjust intensity or color temperature for individual luminaires or a group of luminaires.

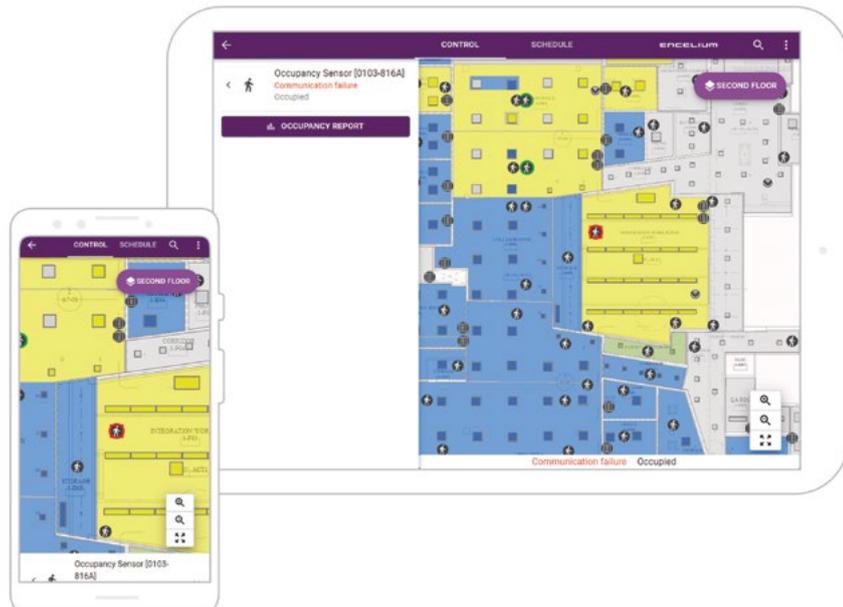

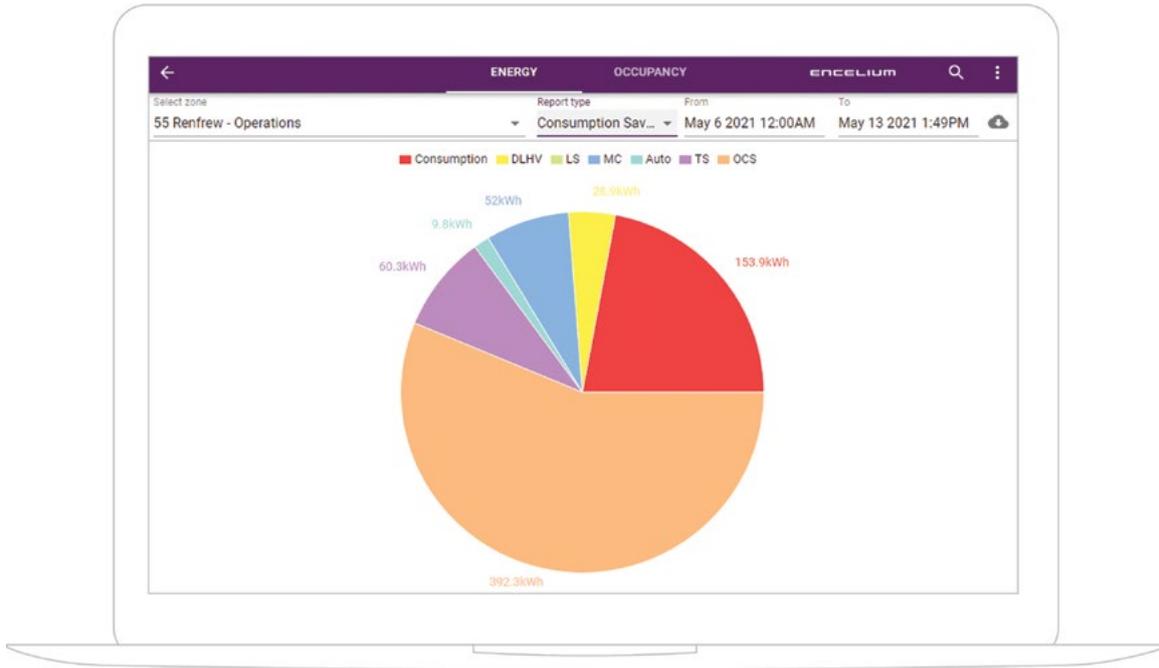

Intuitive Scheduling

Modify light settings for single events or recurring events.

Troubleshooting to Go

Multi-device access with Polaris software lets you troubleshoot with ease from your laptop or mobile device—and from wherever you are.

Insights Made Easy

Polaris provides advanced reporting capabilities that give you deeper insights into power consumption, savings, occupancy, and more.
