

## GETTING STARTED

### Overview

The wiring test tool is a key-fob-sized device designed for installers and contractors to test the wiring of Encelium wireless devices. It helps lighting manufacturers validate installing integrated load controllers like the CLM and SensiLUM at the end of a manufacturing line before shipping to the site. In addition, it helps electrical contractors to test devices like WCM, WALC, WPLCM, and WSLC at a site.

### Available Model

- 56306 (Item Number), EN-ST-ZB (Ordering Code)

## PRODUCT SAFETY

### Read These Instructions Before Using This Product

When using electrical equipment, basic safety precautions should always be followed, including the following:

- ⚠ Keep away from children. Do not disassemble and do not dispose in fire. Dispose of the product at the end of its life cycle in accordance with local regulations.
- ⚠ Properly dispose used batteries.
- ⚠ Risk of fire, explosion, or burns. Do not recharge, crush, disassemble, heat above 212°F (100°C), incinerate.

⚠ **SAVE THESE INSTRUCTIONS.**

# Wiring Test Tool

## Using the Wiring Test Tool

The wiring test tool has two modes depending on the type of installation at the site. First, for commercial applications like offices, schools, healthcare, press the button labeled “NORMAL” to trigger the test sequence for all luminaires in the vicinity to follow a pre-programmed OFF/ON/DIM Down/Up sequence.

For applications with a high ceiling height like warehouses, press the button labeled “HIGH” to trigger the test sequence. The primary difference between the two modes is the signal strength emitted by the test tool.

### Notes:

- Frequent use of HIGH button may lead to shorter battery life.
- Luminaires that have successfully joined the wireless network upon commissioning will not respond to Wiring Test Tool button presses.
